September 4, 2019

To Whom It May Concern:

Google is pleased to inform you that Ezequiel Alejandro Pássaro has successfully completed Google Summer of Code 2019, a program which connects students with mentors for 3 months to develop open source software. Each year many students apply to participate with only a portion of them being accepted into the program, and not every student finishes the program successfully.

Ezequiel Alejandro was accepted into the program by, and developed open source software for, Python Software Foundation beginning May 27, 2019 and ending on August 19, 2019. Over that period, they passed each of the three evaluations conducted by their mentor.

More information on Ezequiel Alejandro's project can be found at:
https://summerofcode.withgoogle.com/projects/5625658653278208

Ezequiel Alejandro worked from home on their project and was not required to visit either Google or Python Software Foundation's offices. They received a stipend of 4200 USD for the project. Although Ezequiel Alejandro was not directly employed by Google during Google Summer of Code 2019, the program was administered by Google from our corporate headquarters and Google acted as the host organization for the duration of Ezequiel Alejandro's participation.

You can learn more about the program on our website at g.co/gsoc. Should you require any further information, please do not hesitate to contact our team via email at gsoc-support@google.com.

Best,

Tony Urso
Google Summer of Code Program Manager
